

Distinctive® Si Powders

February 12, 2013

Luxurious Treated Minerals for Ultimate Smoothness

Resources Of Nature's surface treatment and processing technology dramatically alters the skin feel of natural mineral powders, making them more suitable for a much broader array of products and skin types. With their unique treatment process, they have created a line of hydrophobic powders containing a maximum load surface treatment of a high molecular weight silicone polymer: "Distinctive® Si Powders".

Distinctive® Si Powders provide a smooth, satin-like feel. They have excellent spreadability, offering improved coverage to a variety of product types; emulsion makeups, hot pours, lipsticks as well as loose and pressed powder formulations. Si Powders are recommended for waterproof and long wear products where substantive materials are required.

BENEFITS

- ◆ Creamy feeling
- ◆ Resists discoloration
- ◆ Hydrophobic
- ◆ Improved dispersability
- ◆ Excellent compatibility
- ◆ Improved wear

APPLICATIONS

- ◆ Color cosmetics
- ◆ Powders
- ◆ Hot pours
- ◆ Aesthetic enhancement
- ◆ Oil/shine control
- ◆ Anti-aging and soft focus products
- ◆ Wet/dry powders
- ◆ Sun care

AVAILABLE PRODUCTS

Distinctive® Si-Mica DC3873
Distinctive® Si-Sericite DC3874
Distinctive® Si-Talc DC3875
Distinctive® Si-TiO₂ DC3876

COMPOSITION

Mica (and) Dimethicone
Mica (and) Dimethicone
Talc (and) Dimethicone
Titanium Dioxide (and) Dimethicone
